

ASIM supports cand. med. Peter Forster, student at the Charité - Universitätsmedizin Berlin, for presenting his research results with a travel grant. As graduate student at Northwestern University in Chicago reporting to Dr. Daniel Batlle (Department for Hypertension and Nephrology), he is currently working on the therapeutic potential of the renin-angiotensin system for the treatment of high blood pressure. His 10-minute presentation "Aminopeptidase A regulates acute angiotensin-dependent hypertension" was presented at the 60th Congress of the European Renal Association in Milan (ERA).
